

Want trouble-free access to your SMS?

Take a load off your mind & network by using Edtech's Hosted MUSAC Service. We take care of your SMS updates, backups & more, while you enjoy reliable, secure & easy access to MUSAC via PC or Apple computers, at school & home.

Easy access from home

No more merging to laptops required. From home computers or laptops teachers login directly to the school's database. Changes are saved straight to the server.

Safe and secure access

With Edtech's hosted service your data is safe and secure. Authorised users access MUSAC via 2 levels of password security. Data transfer is protected by 128 bit encryption.

Use existing hardware

You won't need to upgrade hardware just for your SMS. With the MUSAC SMS hosted, it will not place any additional demands on your network or hardware. MUSAC is accessed via a secure web connection so even older computers can be used.

Quick remote changes

Many changes/additions to your school-wide assessment and reporting system are able to be completed live and made available to you immediately. As a school visit isn't required you won't incur any callout charges.

Backups taken care of

Your data is housed in a secure server environment where backups are run daily. Appropriate levels of protection from power fluctuation and server/disk failure are provided. Should data need to be restored this can be done quickly and easily.

Remove unexpected costs

Budgeting becomes easy. Monthly subscription fees provide your school with access to MUSAC Software 24/7. Backups and loading of updates and patches are all included in this fee (MUSAC user training and Classroom Manager development is not included).

One version for all users

All school staff only ever use the latest MUSAC version. We manage the process of loading updates, only after rigorous testing procedures are completed. Any required patches are installed as needed. MUSAC updates on laptops are no longer required.

The benefits of Edtech's MUSAC Hosted Service are clear. But don't just take our word for it...

MUSAC continues to be a dream to work with. It is awesome to hear teachers singing MUSAC's praises, especially being able to use MUSAC from home without having to merge to laptops.

We have got to the end of report printing and have been extremely happy with the way the hosted version of MUSAC has worked. Teachers really appreciated having the opportunity to complete reports at home on their PC or Mac computers. It just worked so well!!!

Something else we hadn't appreciated was the quick response we can get for simple changes to our assessment and reports. We recently had a 24-hour turnaround for some urgent changes which Edtech did remotely. It's also nice not to have to worry about updates and backups anymore, with Edtech taking care of all of that.

Absolutely a great solution!

**Genee Crowley, Deputy Principal
Baverstock Oaks Primary School, Auckland**
